

Advanced FATE course

FATE is the original focused echo protocol practiced since 1989. FATE is easily and quickly learned and can be applied in all clinical scenarios.

Advanced FATE: Basic FATE supplied with extended cardiac views and Doppler ultrasound for cardiac output and pressure measurement together with assessment of LV diastolic function.

Objective

Provide the attendees with advanced echocardiographic needs for the non-cardiologist in order to guide cardiopulmonary optimization including the use of Doppler echocardiography.

The following topics will be covered:

- Repetition of the content of the basic FATE course
- Extended imaging planes
- Basic Doppler ultrasound
- Doppler ultrasound for evaluation of cardiac output, pressure estimation and diastolic function
- Advanced clinical scenarios
- Hands-on in groups of 4-5 participants

All theory is based on E-learning. and the modules must be completed before the course.

Who can attend?

Physicians from all specialities e.g.: Anaesthesiologists, intensivists, emergency physicians, internal medicine physicians, surgeons, general practitioners.

Date: March 19 2013.

Venue: Aarhus University Hospital, Skejby, Brendstrupgaardsvej 100, 8200 Aarhus N.

Pre-course qualification: Basic FATE course or similar.

Course convenor:

Professor Erik Sloth, Department of Anaesthesia and Intensive Care, Aarhus University Hospital, Skejby, having more than 20 years experience with echocardiography (TTE and TEE).

Fee: 400 Euro including lunch access to E-learning modules and lunch

Language: English, if any non-Danish-speaking participants.

Registration:
